**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Itoh et al (US Patent Number 5280464).

In regards to claims 1, 3 and 4, Itoh et al discloses an optical pickup, apparatus and method for applying optical beams to an optical disk (Fig. 1), comprising: a collimate lens (Fig. 1, element 80) for transferring optical beams outputted from a light source to parallel light (Column 2, lines 53-55); and an objective lens (Fig. 1, element 20) for collecting the optical beams transferred to parallel light by the collimate lens (Fig. 1, element 10 changes light to parallel to the objective lens) and applying the beams to the optical disk, characterized in that mounting angles of the collimate lens and the objective lens are adjusted so that astigmatisms of the collimate lens and the objective lens may be offset by each other (Column 2, lines 64-68 and Column 3, lines 1-8).

In regards to claim 2, Itoh et al discloses the optical pickup according to claim 1, characterized in that mounting angles of the collimate lens and the objective lens are adjusted so that the a 0 degree direction astigmatism of the collimate lens and a 0 degree direction astigmatism of the objective lens may be offset and a 45 degree
